10:00 AM - 11:00 AM	Snack Break Platinum Ballroom [5-10]						
---------------------	--------------------------------------	--	--	--	--	--	--

11:00 AM - 12:00 PM Session #1	<p>Joey Himes - Solutionsx, LLC - Surfacing Critical Insights with Infor OS: The speed of information has become a key differentiator in business, yet in many cases the insights you need are buried a few clicks too deep within your ERP data. In this session, we will explore how the Infor OS toolset can fast track your team to the critical information they need with tools like Workspaces and the Infor OS App Designer. By leveraging these great tools included with CSI, you can improve customer satisfaction, harness logistical efficiencies, and ultimately drive your business forward.</p> 	<p>Scott Wolfe - Techosystems - Customer Success Story: Learn how Laminators Inc streamlined their sales and service teams with an integrated CRM to improve visibility across their organization: Come join Scott Wolfe from Techosystems as he meets with (attendee from Laminators TBD) to discuss their decision to move forward with Creatio from Salesforce.com. They will discuss the benefits of a well integrated CRM with sytline to give sales folks a powerful view into their customers with ERP data at their fingertips. Session will include a panel discussion, Q&A and a short CRM demo.</p>	<p>David Willet/Mike Stitt/Lisa Joseph - Decision Resources Artificial Intelligence and Customer Service for Infor CloudSuite Industrial (SyteLine) ERP: Explore options for creating a more streamlined integration between your EDI, OCR, Email, and Commerce tools. Save time, save money, and increase efficiency by consolidating your order management processes. We will dive deep into tips & tricks to decrease manual processes, reduce errors, improve data accuracy, and rapidly increase productivity.</p> 	<p>Michael Keating - Infor - Personalize & Extend CloudSuite Industrial and SyteLine v10: DataViews BEGINNER: In this hands-on session, we will explore DataViews from a user perspective. We'll change the way columns are shown, add groups, change filters, and add summaries. We'll see how these changes can be saved into Layouts and how to switch between multiple Layouts. A working knowledge of form design mode and using IDO's is recommended. BEGINNER</p> 	<p>Perry Coate - Infor - Flex Forms: Intermediate: In this session we will explore techniques to create flexible content layouts for the new generation of CSI forms using flex layout components. Prior experience with design mode is recommended.</p> 	<p>Shelley Horn - Infor - Improving the visual representation of your products to prospects and customers with added capabilities within Infor's enterprise CPQ solution: From interest generation to quoting, ordering, and fulfillment, ensuring your products have the chance to be included in every opportunity is crucial in today's competitive environment. This session will provide an overview of all the many visual options that can differentiate you from your competitors.</p> 	<p>Greg Lake/John Brown - The Lake Companies LLC. - The Holy Grails of SyteLine: Achieving Finite APS and Paperless Success Together: Imagine a world where production planning is simpler, delivery dates are accurate, inventory is streamlined, and manufacturing runs smoothly—without endless meetings or finger-pointing. In this session, we'll unveil the 3 big secrets to unlocking the power of APS Finite scheduling and achieving a paperless workflow in SyteLine. Learn how to optimize your operations, reduce manual processes, and boost efficiency with digital paperwork just a click away. It's time to take your manufacturing game to the next level!</p> 
--------------------------------	--	---	--	---	---	---	--

12:00 PM - 1:30 PM	Lunch - [Marquis Ballroom]						
--------------------	----------------------------	--	--	--	--	--	--

1:30 PM - 2:30 PM Session #2	<p>Joe Reazor - MSM Inc. - Using the Infor OS API Gateway to Integrate and Automate Data and Process: See how we have leveraged the API Gateway in Infor OS to setup access for external systems to both read and write data into CSI. We have implemented three different integrations so far to work with data outside of CSI in an automated fashion. Our integrations include:</p> <ol style="list-style-type: none"> Using a 3rd party AP payment processor to automate and manage AP outside of CSI both reading data from and writing data back to CSI. Pulling data from a custom IDO in CSI and pushing it into our PM system Monday.com, with an integration solution from the vendor MindCloud. Building our first Workspace and custom Widget in Infor OS and leveraging the API through the Data Services in the App Designer to make data easier to access outside of CSI but still within the Infor OS ecosystem. 	<p>Tom Flieri/Wil Goodman - Znode - How Manufacturers Can Digitally Enable Channels and Grow!: Manufacturers have been slow to invest in ecommerce due to worry about channel conflict. What if ecommerce actually enabled channels and removed conflict allowing all parties to grow? Join the Znode team for a discussion on ecommerce and channel enablement.</p> 	<p>Michelle Rydman - Guide Technologies - Delivering Last-Mile Functionality: Revolutionizing Coil Processing, Coating & Slitting in Industrial Manufacturing: Join the Guide Technologies Team and their clients (DermaMed / Technicote) to learn more about how extending CloudSuite Industrial/SyteLine last-mile functionality for coil processing and coating/slitting verticals significantly enhances operational efficiency and product precision by addressing critical end-of-line production reporting and label generation, ensuring traceability and compliance with industry standards.</p> 	<p>Ben Harbron - Infor - Personalize & Extend CloudSuite Industrial and SyteLine v10: DataViews ADVANCED: In this hands-on session, we will explore DataViews from an administrator's perspective. We will use the DataView Wizard to create a runnable DataView, change the Layout of the DataView at the Site level for all users, implement advanced features like expressions, and run the DataView as a background report. A working knowledge of form design mode and using IDO's is recommended.</p> 	<p>Satheesh Batta - Infor - Enterprise Automation: Accelerate innovation with Infor Global Advanced Services</p> 	<p>Tiffany Yan - Qbuild / CADLink - Streamlining Engineering & Infor SyteLine Integration: Unlock Efficiency with NestLink and ECx Manager: Are production slowdowns, shipment delays, excess inventory, or inaccurate data holding your business back? Tired of manually entering work order data into your nesting software and then back into your ERP? Or constantly chasing down people for change requests and approvals through endless email threads? It's time to streamline your processes with ECx Manager and NestLink—two powerful solutions designed to boost productivity and efficiency. ECx Manager simplifies and centralizes engineering change management within Infor SyteLine by enabling seamless workflows. NestLink automatically syncs work orders with nesting software like SigmaNEST and ProNest, then reports the completed job back to Infor SyteLine. Together, these tools eliminate redundancy, minimize production delays, and significantly enhance operational efficiency. Join us to discover how ECx Manager and NestLink can transform your operations, making them smoother, faster, and more efficient!</p> 	<p>Vishal Bhatwara - WM Synergy - APS: The Brain Behind the Machine: In today's fast-paced manufacturing landscape, efficiency, precision, and adaptability are crucial to maintaining a competitive edge. APS (Advanced Planning and Scheduling) serves as the "brain" that powers production operations, seamlessly integrating planning, scheduling, and resource allocation to optimize workflows. This presentation will explore how APS transforms complex production processes into streamlined, data-driven operations, enabling manufacturers to meet demand, reduce lead times, and improve decision-making.</p>
------------------------------	--	---	--	--	---	--	---

2:30 PM - 2:45 PM	Stretch Break						
-------------------	---------------	--	--	--	--	--	--

2:45 PM - 3:45 PM Session #3	<p>Noah Felicioni - Hines Corporation- Our Journey of Migrating to the MT Cloud - Hines Corporation has multiple unrelated companies which are running Syteline various versions, and we are upgrading and merging them into a single database into the cloud with multiple sites. Currently we have our first company live which was on version 8.03. We are scheduled to have the next company live in the cloud in November of 2024, then the last company will move in late 2025. We are performing almost all the migration with our internal IT team.</p> 	<p>Jay Janardhan - IntelliDash - Empower shop personnel with KPIs like Schedule Attainment, Work Center Efficiency and Employee Utilization: Operator engagement is one of the most effective ways to motivate and improve focus and productivity. During this session we will explain how IntelliDash computes and displays KPIs that matter to the shop floor personnel right on their shop floor screens. KPIs covered: Schedule Attainment, Production Efficiency, Employee Utilization, Production Target Attainment, and more.</p>	<p>Reannon Adam- Infor - UI/UX: Learn about Infor's User Interface and User Experience journey with a look at the near term Experience roadmap, including an overview of new Hub concept forms and Role based Workspaces, designed to compliment each other while delivering the user an enhanced, centralized work experience.</p> 	<p>Paul Horne - Infor - InforOS - Get the most out of the new portal and role based workspaces: Discover how Infor OS Portal enhances your daily operations in CloudSuite Industrial (CSI) with role-based workspaces that deliver a tailored experience from the moment you log in. Learn how to streamline workflows, manage by exception, and boost productivity with workspaces targeting specific job functions and displaying actionable data. This session will feature practical demonstrations and real-world examples to help you optimize OS Portal, driving efficiency and a cohesive, branded user experience.</p> 	<p>Ben Harbron - Infor - Flex Forms: Advanced: In this session we will add content to a next generation SyteLine form using many flex layout editing techniques including component templates. We will also demonstrate responsive design using a flex form. Prior experience with design mode is highly recommended.</p> 	<p>Vinay Govande/Don Ortner - Enterprise Systems Partners, Inc. - ERP Benefit Realization through Operational Excellence: ERP investments are critical for strengthening an organization's competitive advantage. This session highlights how aligning operational excellence with ERP initiatives streamlines the processes, sets the stage for continuous improvement, and drives sustainable value. Whether it is a new implementation, migration, or optimization, these principles, methodologies, and operational excellence tools deliver value and return on investment. A human-centric approach to change management ensures the success of every stakeholder and, therefore, the organization's success.</p>	<p>3GTMS/Pacejet - Steven Karem/ Karen Stainbrook/Jason Whitman: Optimize Operations Across Your Organization with 3G Pacejet Shipping Built for Infor: Discover how 3G Pacejet Shipping can optimize efficiency across every department in your organization. This session will explore how Infor shippers can leverage key features in the warehouse, such as predictive packing, self-service shipping paperwork, and address validation, to reduce manual labor by 80%, reduce costs by 30%, and improve accuracy by 99.9%. Hear from long-time customer, Heritage Cutter, on how they've leveraged 3G Pacejet Shipping since 2011 to improve efficiency and standardize processes across three brands and locations.</p>
------------------------------	--	---	--	--	--	--	--

3:45 PM - 4:00 PM	Snack Break Platinum Ballroom [5-10]						
-------------------	--------------------------------------	--	--	--	--	--	--

<p>4:00 PM - 5:00 PM Session #4</p>	<p>David Heffler - Infor - Integrations to other Infor and non Infor products (presentation): In this session we will demonstrate an integration leveraging Infor OS to expand the power of your CSI CloudSuite. We will go through how the integration was assembled and also demonstrate that integration to enhance your CSI ClouSuite's effectiveness for your organization.</p> 	<p>Bryan Marks - Syncsite - See how Infor CRM SLX with SyteLine/CSI integration, Business Intelligence and Marketing Automation can transform your company with customer examples: Join us for an informative session regarding the key benefits of Infor CRM SLX integrated with SyteLine/CSI ERP through examples and actual customer use cases. See how the integration works and learn about the award-winning Infor CRM SLX solution with features like Outlook integration, mobile optimization, marketing automation, market intelligence and personalization options for every CRM user. Infor CRM SLX offers all the core features of sales, service and support in one. No tiers to sort through, faster ROI than Salesforce and bi-directional integration with SyteLine/CSI.</p> 	<p>Fadel Haroun/Mark Rinehart - Godlan/ACS Group - COME LEARN! Configuring Gen2 Forms, Themes, Data Views, Dashboards/Hubs, & Widgets!: This learning packed session will cover Configuring the new Gen2 Forms, working with the new Themes, how to use Dataviews, mastering the new Dashboards/Hubs, winning with Widgets, and even Event Automation will be covered! We'll also have Mark Rinehart from Godlan customer ACS Group with us to share real-world experience and use cases.</p> 	<p>Marcello Martins - Infor - Low/no Code - Beginner: In this session we will explore building widget solutions for SyteLine in OS Portal using the new low/no code OS App Designer (OAD).</p> 	<p>Mary Zecca - Infor - Workflows vs. AES: Workflows vs. AES</p> 	<p>Sarah Butler - The UniLink Group - EDI: A Competitive Advantage for Manufacturers: Many businesses are pressured into adopting EDI without a good understanding of how it works or exploring the solutions available. We will explore the options available and how Electronic Data Interchange (EDI) can provide manufacturers with a significant competitive edge. Our experts will discuss the benefits of EDI, real-world applications, and strategies for successful implementation. Topics covered during this session include:</p> <ul style="list-style-type: none"> •EDI Basics – Electronic Data Interchange in simple terms. An explanation of document flow between trading partners and how it enables the exchange of business documents, streamlining business processes, reducing manual errors, and improving efficiency in supply chain management. •Navigating Vendor Requirements and Formats – An overview of the common EDI formats and standards and how through mapping and translation these can meet specific and unique requirements of your vendors and customers facilitating seamless communication between all trading partners regardless of their protocols. •Implementation Tips – We'll highlight best practices for smooth EDI integration with your trading partners and compliance with industry standards. From trading partner onboarding, mapping, testing and validation, and ongoing support and maintenance, we'll show you how to set 	<p>Raju Surendra - Infor - Factory Track - Shop Floor & Time Track: Join us for a deep dive into the highly anticipated new Shop Floor. Hear firsthand experiences from early adopters that have successfully implemented the new Shop Floor and have improved their production process. Bring your questions to the interactive Shop Floor Early Adopter Q&A and learn how Shop Floor can benefit your production operations.</p>
<p>5:15 PM - 7:15 PM</p>	<p>Welcome Reception -Platinum Ballroom [5-10]</p>						
<p>8:00 PM - 9:30 PM</p>	<p>Concert - The 80's Rock Tour (Lou Gramm of Foreigner / Steve Augeri of Journey / John Payne of Asia) - [Marquis Ballroom]</p>						

Tuesday, February 25, 2025

Rooms	Platinum Ballroom 1-2	Platinum Ballroom 3-4	Grand Ballroom G-K	Grand Ballroom E	Grand Ballroom F	Orange County Ballroom 1-2	Grand Ballroom A-D
Time							
7:00 AM - 8:30 AM	Registration and Info table open [Registration Desk] Breakfast - [Marquis Ballroom]						
8:30 AM - 8:40 AM	Opening Remarks - Ken Kemp [Marquis Ballroom]						
8:40 AM - 10:00 AM	Infor Executives Soma, Rick Ryder, & Marin Haning - CSI SyteLine and Technology Roadmap 15 minute Q&A with Soma/Rick Ryder/Marin Haning						
10:00 AM - 4:30 PM	Vendor Fair OPEN Platinum Ballroom [5-10]						
10:00 AM - 10:45 AM	Snack Break Platinum Ballroom [5-10]						
10:45 AM - 11:45 PM Session #5	<p>Cassie Noles - JD Noles Consulting - EDI, APIs, EasyPickEasyShip and more: Cassie with her team will start the order process with EDI and APIs(managing multiple protocols getting order data into SyteLine). JDN will be introducing EasyPickEasyShip for simplified shipping and touching on the UPS/FedEx integration for labeling. This will finish the 'order to fulfillment' process. Included on our discussion will be areas where complex EDI requires a partner to translate and send unique partner data and how that affects SyteLine processing. We will demonstrate how JDN leverages partnerships with Infor and the Unilink Group as an EDI translator to avoid costly mistakes/errors.</p> 	<p>Marty Rhodes/KevinPollard - Single Source Systems/Corovan - IncentViz – Commission Management for Syteline: Attend this session and hear Kevin Pollard, IT Director of Corovan, the largest commercial moving and storage company in the Western U.S., explain how IncentViz helped improve accuracy and reduce their monthly commission generation and processing time. In addition to hearing the value IncentViz brought to Corovan, you'll see the product in action and learn how IncentViz, an integrated solution for Syteline from Single Source Systems, provides a sales compensation platform to manage sales plans, targets and quotas, commissions owed and paid, and even rebates to customers.</p> 	<p>Jim Maughan - Cyberscience Corp - Easy-to-use, Real-time Reporting, Dashboards and Financial Statements: See how using Cyberquery (CQ) makes information access and delivery simple, quick, and impactful (reports, spreadsheets, charts, drill downs...). CQ is intuitive, fast, and powerful. Cyberquery supports all major databases and ERP's including CSI (cloud), SyteLine, Visual, CSD, Infor LN, QAD, JDE, Oracle and SAP. With over 4,000 customers using CQ, the product is proven and priced right! Attend the session or stop by our booth to ask about the free evaluation copy of CQ.</p> 	<p>Perry Coate - Infor - Flex Forms: Intermediate: In this session we will explore techniques to create flexible content layouts for the new generation of CSI forms using flex layout components. Prior experience with design mode is recommended.</p> 	<p>Michael Keating - Infor- Personalize & Extend CloudSuite Industrial and SyteLine v10: DataViews BEGINNER: In this hands-on session, we will explore DataViews from a user perspective. We'll change the way columns are shown, add groups, change filters, and add summaries. We'll see how these changes can be saved into Layouts and how to switch between multiple Layouts. A working knowledge of form design mode and using IDO's is recommended. BEGINNER</p> 	<p>SUN - Round Table - APS: Open forum to discuss topic. Bring your questions to get answers and your knowledge to help others</p>	<p>David Heffler - Infor - Infor OS Technology Platform - Capabilities and Roadmap utilized by CloudSuite Industrial and SyteLine: This session will provide an update of the Infor OS roadmap and discuss how CSI is leveraging those features to provide you will a solution that allows you to be competitive in your industry.</p> 
11:45 AM - 1:15 PM	Lunch - Business meeting , HOF and Giveaways [Marquis Ballroom]						
1:15 PM - 2:15 PM Session #6	<p>Neil Battarbee/Logan Bowles - CAI/Springfield ReManufacturing Corp (SRC) - Optimizing Engine Remanufacturing with Digital Process Controls: Springfield ReManufacturing Corp (SRC) is committed to delivering superior remanufactured engines and components. Through advanced digital process controls, SRC: •Enhance quality: Precisely identify and rectify discrepancies between physical and digital data. •Drive continuous improvement: Employ efficient kaizen methodologies to optimize processes and reduce waste. Discover how SRC's innovative approach is setting new standards in the remanufacturing industry as they share some of their lessons learned, including: •Go Big: Workshop and Roadmap for Achieving Organizational Success •Plan to streamline operations: Optimize your business processes and ERP structures to enhance digital build card accuracy and effectiveness. •Achieved win-win: Unexpectedly improved both efficiency and accuracy, even though we budgeted for a sacrifice in throughput with an increase in quality.</p> 	<p>Max Fisher - Infor - Accelerate Innovation with AI-Powered Enterprise Automations for Discrete Manufacturing: The connection between fast innovation, growth, and industry advantage is stronger than ever. Learn from Infor customers who innovated in record time and generated measurable results using Infor Value+ Enterprise Automations. These pre-built solutions for our industry-specific CloudSuites leverage AI, RPA, and other advanced technologies to automate and accelerate your business operations. Learn about how our out-of-the-box capabilities for invoice processing, Proof of Delivery (POD), workflow audits, sales quote approvals, supplier compliance checks, and more help to improve manufacturing versatility and accelerate speed to market that will give you a competitive advantage.</p> 	<p>Michael Huston - Infor - IDM: Uncovering SyteLine's Infor Document Management Integration Explore SyteLine's integration to Infor Document Management from technology foundation taking advantage of IDM's data model interwoven into SyteLine's core processes. Learn the integration's origins and the journey to current features such as bundling, contextual enterprise printing, and an enhanced approach to emailing printed documents.</p> 	<p>Paul Horne - Infor - InforOS - Get the most out of the new portal and role based workspaces: Discover how Infor OS Portal enhances your daily operations in CloudSuite Industrial (CSI) with role-based workspaces that deliver a tailored experience from the moment you log in. Learn how to streamline workflows, manage by exception, and boost productivity with workspaces targeting specific job functions and displaying actionable data. This session will feature practical demonstrations and real-world examples to help you optimize OS Portal, driving efficiency and a cohesive, branded user experience.</p> 	<p>Ben Harbron - Infor - Personalize & Extend CloudSuite Industrial and SyteLine v10: DataViews ADVANCED: In this hands-on session, we will explore DataViews from an administrator's perspective. We will use the DataView Wizard to create a runnable DataView, change the Layout of the DataView at the Site level for all users, implement advanced features like expressions, and run the DataView as a background report. A working knowledge of form design mode and using IDO's is recommended.</p> 	<p>SUN - Round Table - Finance: Open forum to discuss topic. Bring your questions to get answers and your knowledge to help others</p>	<p>Laurie Tallon/Denny Hendrix - MECCO/KJFAIC - Advanced Workflow in the "Infor Cloud" and on-premises: Utilize Workflow Breeze with the "Infor Cloud" or on-premises for an efficient end-user experience.</p> 
2:15 PM - 2:30 PM	Stretch Break						
2:30 PM - 3:30 PM Session #7	<p>Brian Davis - QA1 - Use the Application Event System for more than just sending E-Mails: I was recently asked to perform a GET CTP Nightly for every Item we sell on our Website. I needed a way to call the GET CTP IDO Method and write the results to a Custom Table. I chose to use the Application Event System to do this. This Session will look at Application Events I created to perform this task. These Application Events can be used by both On-Prem and Cloud Customers. As Infor moves more IDO Methods from SQL Stored Procedures to .Net Assemblies, you will need a tool that can interact with these IDO Methods to perform the work that would have been done with SQL Triggers or T-SQL Code</p> 	<p>Kyle Meyers/Scott Frankenfield - Prophecy/Daniels Manufacturing Corporation - Achieve Next Level Growth – Capture Real Time Shop Floor Data with Industrial IoT: All the action on the shop floor happens "between the punches" of job orders. Learn how to use real-time machine information from the shop floor to close the gap by capturing patterns of machine use, downtime reasons, and quality to drive enterprise performance improvement. Combined with ERP data, Prophecy generates the intelligence you need for next level growth! Hear from a current user and learn about their path to success.</p> 	<p>Suresh Jayaraman - Infor - Elevate Your Business with Infor Process Mining: Insights and Excellence from Xpress Boats: Process mining is essential for Infor's manufacturing customers to gain unparalleled visibility into complex business processes. This presentation will explore how Infor Process Mining can be applied across multiple manufacturing-specific business processes, enabling organizations to optimize operations, reduce costs, and drive continuous improvement. We will help you discover how Infor Process Mining enhances transparency and efficiency in procurement operations. This includes detailed insights from procure-to-pay lifecycles, improving cash flow and customer satisfaction by optimizing order-to-cash processes, streamlines inventory management, or accelerates cash conversion cycles. You will further gain visibility into production planning and delivery schedules to streamline manufacturing processes and ensure on-time customer deliveries. By analyzing transactional event data captured within your CloudSuite, you can quickly assess inefficiencies, bottlenecks, and areas for improvement in business processes and workflows.</p> 	<p>Joe Tran - Infor - Personalizations: Personalize & Extend CloudSuite Industrial and SyteLine: Component Classes, List Sources, Validators and 'When Logic'</p> 	<p>Ben Harbron - Infor - Flex Forms: Advanced: In this session we will add content to a next generation SyteLine form using many flex layout editing techniques including component templates. We will also demonstrate responsive design using a flex form. Prior experience with design mode is highly recommended.</p> 	<p>SUN - Round Table - Cloud: Open forum to discuss topic. Bring your questions to get answers and your knowledge to help others</p>	<p>CADTalk - AI and LLM will disrupt integration of Engineering and Manufacturing: We will uncover how AI and LLM can enhance data flow between CAD, PDM, PLM, and ERP, ensuring that data is not only seamlessly transferred but also intelligently processed to enhance decision-making and operational efficiency. We'll examine case studies where CADTALK has successfully implemented AI-driven strategies to synchronize these systems, reducing errors, speeding up product development cycles, and fostering innovation.</p> 
3:30 PM - 3:45 PM	Snack Break Platinum Ballroom [5-10]						

<p>3:45 PM - 4:45 PM Session #8</p>	<p>Ryan Pukanski - Volant - Application Event System – Automate Tasks and Data with built in Syteline tools: Learn the capabilities of AES, how it can replace your legacy formscript code and speed up your uplift process as a result. Here you will see examples of AES performing data checks, changing data based on calculations and workflows, as well as running automated IDO methods so your users don't have to, all without having to write any customizations!</p> <p style="text-align: right;"></p>	<p>Kurt Kiley - Adams Automation - Foundations of Forecasting and Safety Stock in Syteline APS & MRP: In this session, you'll explore the essential principles of forecasting and safety stock management within Syteline ERP. We will walk through the key configurations and tools available in Syteline to help you effectively anticipate demand and maintain optimal inventory levels. Learn how to set up forecasting models, determine appropriate safety stock levels, and manage lead time variability to ensure a smooth supply chain process. By the end of the session, you'll be equipped with the foundational knowledge needed to confidently manage your inventory in Syteline ERP.</p>	<p>Bhavana Musuluri/Pritesh Shah - Piyovi - Streamlining Shipping with Piyovi: A Global Solution for Infor CSI/Syteline: At CloudLeap, we understand the critical need for an integrated shipping platform. Our Piyovi shipping software, a global solution, efficiently manages Infor CSI/Syteline Orders across a variety of shipping modes, including Small Parcel, LTL, FTL, and 3PL/Broker. The user-friendly interface simplifies key tasks like rate shopping, printing carrier-compliant shipping labels and BOLs, tracking and invoice auditing.</p> <p>We also provide comprehensive support for international shipping, including DG/Hazmat compliance. Hear directly from one of our CSI customers about the positive experiences and benefits they've gained from using the Piyovi shipping software.</p>	<p>Marcello Martins - Infor - Personalizations (Upgrades): Personalization Best Practices for Upgrade Safe Extensibility using Gen2 Forms.</p> <p style="text-align: right;"></p>	<p>Melissa Mae San Juan - Infor - Process Modeler: Please join us to learn about IPIs Process Modeler and how it can help in you capture and design operational processes that can improve business efficiency by standardizing your individualized, unique process models. leveraging standard industry-based business processes tied to your Infor applications using our modeling capability. Come and have a hands-on experience on how to take the standard multi-level business processes and tailor it to your organizations needs and deploy it back in your tenant using our IPI modeler.</p> <p style="text-align: right;"></p>	<p>SUN - Round Table - OnPrem: Open forum to discuss topic. Bring your questions to get answers and your knowledge to help others</p>	<p>John Rood/Mike Stitt/Lisa Joseph - Decision Resources - Driving Advanced Efficiency & Automation for Infor CloudSuite Industrial (Syteline) ERP: Take a deep dive into practical applications of Artificial Intelligence (AI) tools built for Syteline. Leverage the latest technology advancements to automate and enhance customer service processes. Learn how AI can access your ERP and CRM data in a secure environment to enhance your customer experience, support, ordering, ticketing, and more!</p> <p style="text-align: right;"></p>

Wednesday, February 26, 2025

Rooms	Platinum Ballroom 1-2	Platinum Ballroom 3-4	Grand Ballroom G-K	Grand Ballroom E	Grand Ballroom F	Orange County Ballroom 1-2	Grand Ballroom A-D
Time							
8:00 AM - 9:00 AM	Breakfast and Info table open Platinum Ballroom [5-10]						
8:00 AM - 11:30 AM	Vendor Fair OPEN Platinum Ballroom [5-10]						
9:00 AM - 10:00 AM Session #9	<p>Aaron Hannan - SPS Commerce - The Customer EDI Experience with SPS for CloudSuite Industrial: Slow Customer Onboarding? Retiring EDI Staff? Join us to hear from a user how SPS Commerce, the global leader in Cloud Based Fulfillment Automation, is the perfect fit to help CloudSuite Industrial customers excel in EDI automation, without having to possess internal EDI expertise.</p> 	<p>Greg Keating - Infor - Advanced Planning and Scheduling (APS) - Beginner: The Finite APS module is included with a cloud subscription to CloudSuite Industrial and is optional with Syteline on-premises. Are you confused about your Syteline/CloudSuite Industrial APS or ATP results? Want to know more about how this advanced planning capabilities work? This session will take you through the important data elements and parameter settings to get you on the right path towards getting the most out of your production resources.</p> 	<p>Doreen Logan/Denise Butler/Matt Geik - BW Design Group/Electri-Flex/Flat World Global Solutions - A Syteline/CSI User's Success Story on how they improved multi-modal quoting and shipping both upstream and downstream for their teams by keeping functionality and data in Syteline/CSI: This session will demonstrate how one customer's desire to have their teams stay in platform (cloud and on premise) versus having to jump between platforms when it comes to their shipping needs lead to a creative solution that can be utilized by any users. We'll walk through the real experience, creation and the end result solution of a collaborative effort with partners that created a solution that drives, efficiency, speed, improved accuracy, removed keystrokes and time and improved data access and application while helping them better manage their shipping costs. The session will be wrapped up with a Q&A with the customer that was the catalyst for the creation of this dynamic solution.</p> 	<p>Satheesh Batta - Infor - Enterprise Automation: Accelerate innovation with Infor Global Advanced Services</p> 	<p>Joe Tran - Infor - Personalizations: Personalize & Extend CloudSuite Industrial and Syteline: Component Classes, List Sources, Validators and 'When Logic'</p> 	<p>SUN - Round Table - Reporting: Open forum to discuss topic. Bring your questions to get answers and your knowledge to help others</p>	<p>John Perry/Steven Royce - Sparkflow-Liventus/Great Plains Ventures - Our Journey from the Data Swamp to a Data Warehouse: Great Plains Ventures - success with the Sparkflow Data Warehouse and Power BI</p>
10:00 AM - 10:15 AM	Stretch Break						
10:15 AM - 11:15 AM Session #10	<p>Jeremy Finley/Wil Coughlin - RenaissanceTech/Tucker Door - Tucker Door's Syteline & CPQ Review - How to connect dealers and DRIVE revenue: Learn how Tucker Door grew dealer portal revenue from \$5,000 to \$2,000,000 within 3 years. Wil Coughlin, IT Manager at Tucker Door, will demonstrate their visually striking dealer portal powered by Infor CPQ and fully integrated with Syteline ERP. Learn how this portal isn't just nice to look at—it simplifies complex configurations and enhances the sales process, all while making data more accessible for the team. See how the powerful functionality behind the beauty delivers measurable results, streamlining operations for manufacturers in the door industry and beyond.</p> 	<p>Greg Keating - Infor - Quality Control Solution (QCS): How to utilize CloudSuite Industrial's QCS module in a regulated industry.
